-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Felzer (US 3,827,525 A).

Felzer discloses a vehicle comprising a floor panel defining a floor tunnel portion 40 that extends rearwardly and inclined at the front for a power transmitting device (or engine with transmission) 36, as shown in figures 1-5.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Felzer (US 3,827,525 A) and in further view of Ito (US 5,203,749 A).

Felzer discloses a vehicle comprising a floor panel defining a floor tunnel portion 40 that extends rearwardly and inclined at the front for a power transmitting device (or engine with transmission) 36 each inherently in a casing, as shown in figures 1-5.

Art Unit: 3618

Felzer does not disclose the input shaft as being above the output shaft. Ito does disclose a transmission comprising an input shaft 11 as being above the output shaft 12, as shown in figure 1. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the vehicle of Felzer with the transmission of Ito in order to shorten the length of the transmission.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Felzer and Ito, as applied to claim 1 above, and further in view of Massel (US 5,193,415 A).

Neither Felzer nor Ito disclose a projecting portion on the transmission casing. Massel does disclose a projecting portion 14 on a transmission casing 22 extending upward and in the longitudinal direction for protecting the transmission, as shown in figures 1-2. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the vehicle of Felzer as modified by Ito with the projection portion of Massel in order to further protect the transmission from damage in a collision.

6. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Felzer, as applied to claim 4 above.

Felzer does not explicitly disclose auxiliary equipment under the floor tunnel. The use of turbochargers and/or exhaust catalysts are conventional in the art and it would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the vehicle of Felzer with a turbocharger and/or exhaust catalyst in order to increase horsepower and decrease emissions, as is commonly applied in the art.
